Long Term and Three Hour Challenges

Each CD includes Maths Engineering, Language Literature and Social Sciences Challenges. They provide excellent curriculum material for multi-age groups and are well suited to high ability learners and multi-talented groups. They complement units of work in Maths, Technology, English, SOSE, History and Geography with whole class or small groups. Undertaking the Challenges builds team cooperation whilst encouraging independent learning which demands research, lateral and creative thinking and presentation skills. Overall they provide students with experience in Tournament of Minds challenges and processes.

Spontaneous Challenges

The Spontaneous Challenges can be used with the whole class or small groups; as part of a program to develop problem solving and develop creative thinking; as early morning class warm ups; and to develop problem-solving skills necessary for Tournament of Minds.

Informative DVD

Discover Tournament of Minds - a highly successful problem-solving program for teams of students from Primary and Secondary Schools. The 30-minute DVD outlines the structure of the program with contributions from students, parents and team facilitators. It is a useful tool to assist with fundraising. Successful strategies used in developing the necessary team skills are also outlined.
